Let's start by importing the sketch template. You can do this or draw from scratch, whichever you're comfortable with. You can use the Peppermint brush when sketching.

Next, add a new layer and start creating closed shapes. Fill them with color.

Now for the fun part! Add shadow and highlight to make it look more realistic. Using Freya Tamar Cloud Brush gently blend the colors so that have a textured gradient around the bauble. If you don't have the Freya Tamar Cloud, you can use Procreate's default Tamar brush.

Now add another layer on top of the ball, and set it to clipping mask. Using the free glitter brush provided in this lesson, gently stamp around the top where the highlight should be.

Add another clipping mask layer. Turn on the drawing Guide and drawing assist to help you draw a symmetrical pattern. Follow this: Actions> Canvas> turn on Drawing Guide> edit Drawing Guide> choose Symmetry: Vertical. Use the glitter brush with the layer set to "Add" mode
