## **YELLOW TULIP**

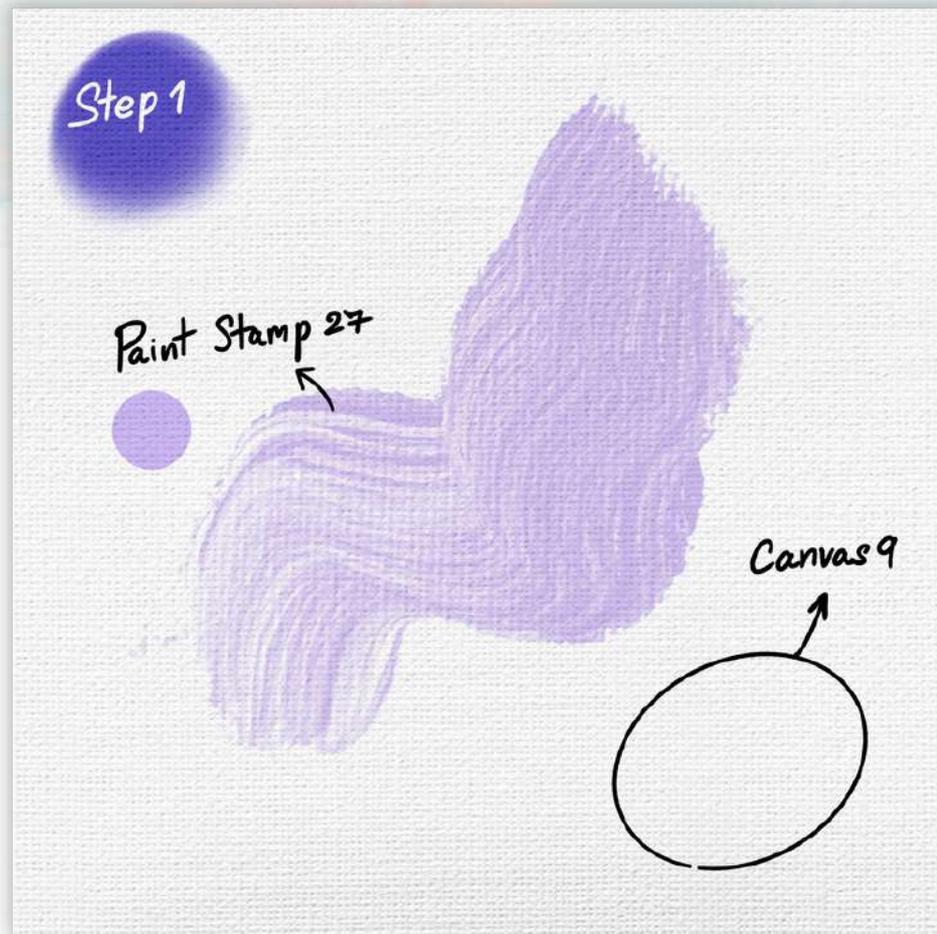

[\*Click here to download the files\*](#)

Step 1: Download the palette swatch. Once it's in your Files App, just tap on the .swatches file and it should import automatically to Procreate.

Create a 3000 x 3000-pixel canvas.

Rename the first layer as Canvas Texture. Then choose Canvas No. 9 brush and set the color to a light grey color. Swipe the texture on the layer.

Now add another layer and using Paint Stamp No. 27, add a backdrop in a lilac color.

Step 2

Step 2: Add 2 more layers, one for the Tulip petals and one for the stem.

Using Oil Wet No. 15, paint the base shapes.

### Step 3

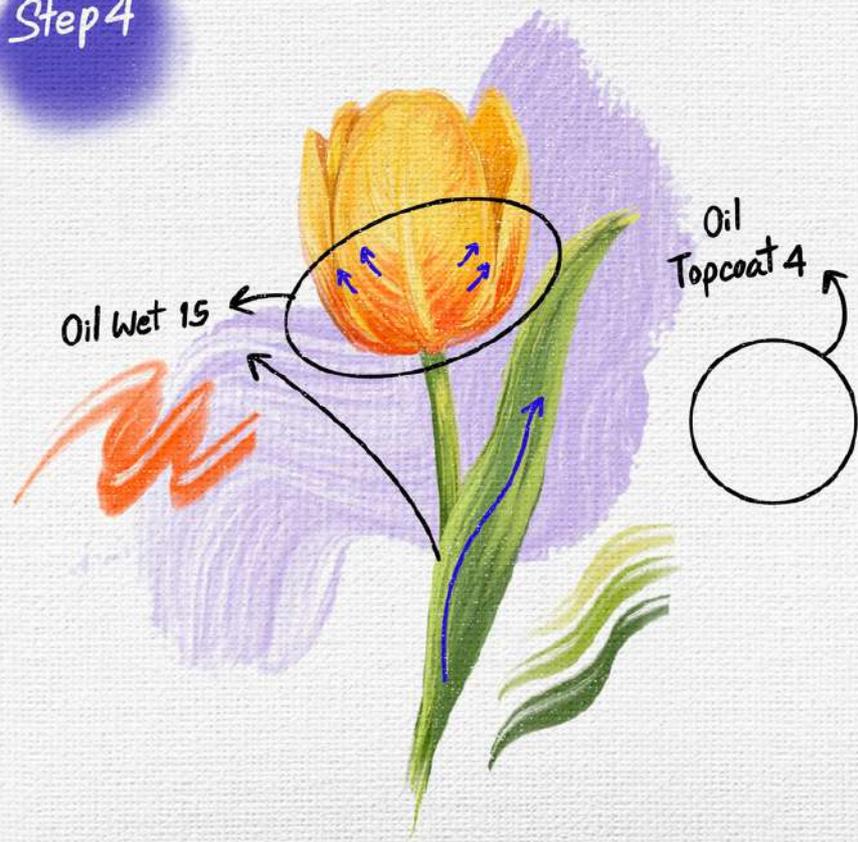

Step 3: Add a clipping mask on top of the base layers. Draw the details with the same brush.

Step 4: Add another clipping mask layer and continue adding more details using the same brush.

And as a final step, add a final layer for the Oil Topcoat No. 4 brush. Set this layer to Linear Burn so that the rest of the canvas will take on an additional texture.

### Step 4

And there you have it! A yellow Tulip painting using the Freya Oil Brush Set.
